NOTE

from : Presidency
to : Working Party on SIS (Norway/Iceland Joint Committee)
Subject : Training on encryption devices

In the frame of short-term measures to enhance the security management of the SIS, the Working Party on SIS-Technology considers it necessary that members of the C.SIS Exploitation Team get a training on the access lists of the KryptoGuard.

Global One has made the following offer for this training:

	When organised in Aachen	When organised in Strasbourg
Duration	2 days	2 days
Content	Management, Access lists and wildcards	Management, Access lists and wildcards
Number of Participants	2	2
Price	150.000 BEF (excl. VAT)	445.000 BEF (excl. VAT)
Travel and accomodation expenses	Expenses of participants are not included in the cost	Expenses of trainers are not included in the cost and will be invoiced separately
Additional Participants	max. 3 additional participants allowed at 75.000 BEF per person	not possible

In consultation with the C.SIS Exploitation team, it was agreed that the training can be held in Aachen at the end of the year 1999 or in the beginning of the year 2000, depending on the organisation of the work, and more specifically the C.SIS 1+ project.

The Council Working Group SIS is requested to agree on this proposal and if it does, to foresee the necessary funds on the Sirene phase II budget and to agree that the travel costs be charged to the common C.SIS exploitation budget.
